Android Developer with hands-on experience in **Java, Kotlin, and Android Studio**. Proficient in **MVVM architecture, Jetpack components, Retrofit, and Firebase**, with a strong focus on **scalable, high-performance mobile apps**.

Education

MCA	Masters of Computer Applications	July 2023 – June 2025
	• GD Goenka University, Gurgaon	
BCA	Bachelor of Computer Applications	July 2020 – June 2023
	• Chaudhary Ranbir Singh University, Jind	

Technical Skills

Languages & Architecture: Java, Kotlin, MVVM Architecture, Jetpack Components (ViewModel, LiveData, Room Database)

Android Development: Android Studio, Jetpack Compose, XML UI Design, Coroutines & Flow for asynchronous tasks, API Integration (Retrofit, Volley, OkHttp), Firebase, Push Notification

Tools & Version Control: VsCode, Git, GitHub, Postman, CI/CD Pipelines

Backend & Databases: Node.js, Firebase Firestore, MongoDB, MySQL

Other Skills: Unit Testing, Performance Optimization, UI/UX Enhancements, Teamwork, Problem Solving

Projects

Movie Search App (Android - Jetpack Compose)

- Built a dynamic app using Watchmode API to fetch real-time movie data.
- Implemented MVVM architecture with Jetpack Compose, improving UI maintainability.
- Integrated Retrofit API to fetch live movie data, reducing load time and Utilized Coroutines & Flow for background API calls, ensuring a smooth UI.
- **Technologies Used:** Kotlin, Jetpack Compose, Retrofit, MVVM, Coroutines, LiveData, ViewModel

DOC Study Helper (Educational App)

- Developed an educational app for managing and sharing study materials.
- Integrated Firebase notifications and role-based authentication with a custom backend API.
- **Technologies Used:** Java, Kotlin, Firebase, Node.js, MongoDB, API Integration

Marriage Photography System (Event photo-sharing app)

- Implemented face recognition using Machine Learning to help attendees find their photos quickly
- Built a secure authentication system with JWT & Firebase Authentication and used Jetpack Navigation Component for seamless in-app navigation
- **Technologies Used:** Android studio (Java/Kotlin), Node.JS, Creating Custom API's, MongoDB, Machine Learning

Internship Experience

Android Developer Intern	December 2024 – April 2025
Eigen Technologies Pvt. Ltd. (Gurugram, Haryana)	
• Built and maintained Android applications using Java, Kotlin, and Android Studio	
• Implemented MVVM architecture, Jetpack components, and Retrofit API integration	
• Worked on Firebase services, push notifications, and performance optimization	
• Collaborated with the development team to enhance app features and user experience	

Achievements

- **Academic Excellence Award** – Secured 3rd Rank in University Examination.
- **Built & Published 3+ Android Applications** integrating real-world API solutions.
